Delivery Artifacts & Execution Evidence

Technovation (via SoftServe) – examples of product ownership artifacts created and used during delivery:

Meeting Minutes • Epic Scope Definition

Meeting theme: Attendance tracking system (key tag scanning system)

Date of meeting: 17.11.2011

Participants: XXXX

Agenda:

1. Discuss what was already done in attendance tracking direction
2. What should be done to bring current system to production;
3. What is the best way to integrate with "Blueprint";
4. Answers to prepared questions

Results:

During the meeting we got answers to prepared questions

I. Iridescent team wants to implement updated application to "Attendance tracking system". The main feature of it are:

1. Existed application is not accessible to Internet and web browser. Iridescent. There are 50 laptops with the installed application.
2. All attendee will have a key tag. There are five categories: students, volunteers, administrators. The categories may be included in these attendee in person-type information.
3. A user may have only one active key tag, if user lost it, there is a possibility to replace old key tag with new one, with the help of administrator. Besides student's information, key tag should contain information about Guardian may become: adult sister, brother, tutor, and so on.
5. A key tag has only one user's profile
6. There are free registration forms, that filled manually. Information manually are entered into the system and associated with key tag.
7. All key tags (with bar codes) are preprinted and their list should be a list of unused key tags imported into the system;
8. For now key tag system is used only by 50 families
9. Registration process of key tag: User should give his contact information for key tag obtain. Only real users (with a phone number) are registered manually by administrator. When user is registered, he is given a key tag. Not all registered users in curiosity may have a key tag.
10. Key tag information is stored in MySQL database
11. User may participate in Program without key tag (if they are not at summer camps. So some programs requires key tag for visitors;
12. Administrator schedules a program to users in key tag system
13. Programs are free of charge, camps are not.

II. New requirements to application:

ID	Module (epic) name	User story (Requirement)	Priority
US001	1.User profile and login	As a user I want to be able to register and create my profile in order to be provided proper permissions by the system and to be identified by professionals and peers (S-2).	Must
US003	1.User profile and login	As a new user I'd like to state my will to be a contributor and provide the relevant information about my experience in order to get access to the professional space.	Should
US004	1.User profile and login	As administrator I would like to view all applications of contributors for Professional space access in order to authorize or decline requests.	Should
US007	2.Learning space	As a student I want to rate the viewed content in order to show what is more interesting and valuable for me.	Nice to have
US008	3.Sharing space	As a student I need to be able to film my experiments and POST THESE TO SHARING SPACE, also share the results with my peers and professionals in order to get feedback and improve skill/results(S-2).	Must
US009	3.Sharing space	As a professional/assessor I need to view the experiment records (reports) shared by students and relevant to the topic of my interest/related to content submitted by me, in order to provide feedback and assess the results.	Must
US010	4. Professional space	As a professional I need to view and publish content (curriculum) to the professional space, in order to share and refine with other professionals.	Should
US016	5.Mobile access to learning and sharing spaces	As a student I want to view content from Learning space on my mobile device.	Should
US017	5.Mobile access to learning and sharing spaces	As a student I want to capture video on my mobile device and upload it to sharing space under my ID in order to use it conveniently without dragging my laptop everywhere.	Must
US019	9.Social Networking	As a user I want to network (connect) with other users and get notifications about their updates in order to be informed as a part of peer community and socialize while learning/teaching (may be reached by use of external services integration)	Must
US020	10.Structuring activities/groups	As a professional/assessor I want to get updates about new uploads in groups to which I am subscribed in order to review and provide feedback/assessment to experiments of users who are awaiting response.	Should
US022	6.Security	As a parent I want the user profiles and sharing space of portfolio (system) to be not accessible for not confirmed users (unregistered or not activated)	Must
...

Thank you for your time!
