

Recommendation for Niiara Mamontova

To whom it may concern,

I am pleased to recommend Niiara Mamontova, who worked as a Product Manager at Plat.ai under my management. During her time with our organization, Niiara demonstrated strong ownership of product initiatives and consistently contributed to improving the structure and delivery of our loan origination and AI-driven platform.

In her role, Niiara worked closely with engineering, data science, and business stakeholders to define product requirements and translate business needs into actionable development tasks. She managed the product lifecycle from discovery through delivery, ensuring alignment between client expectations and technical implementation. Her ability to balance business priorities with technical constraints helped streamline decision making and reduce ambiguity for the development team.

Niiara was particularly effective in organizing workflows, clarifying requirements, and improving communication across cross functional teams. She contributed to roadmap planning, backlog prioritization, and release coordination, while maintaining a practical and structured approach. Her documentation and stakeholder communication were clear and concise, which helped maintain transparency and execution consistency.

She also showed strong analytical thinking when evaluating feature requests and operational challenges. Niiara approached problems methodically, focusing on practical solutions and measurable outcomes. Her contributions supported improvements in product stability, delivery predictability, and alignment between product strategy and client needs.

Based on my experience working with her, I believe Niiara Mamontova is a reliable and capable Product Manager who brings professionalism, organization, and thoughtful execution to her work. I recommend her for roles where structured product leadership and cross-team coordination are important.

Please feel free to contact me if additional information is needed.
